Pride® Lift Chairs | *Experience the Luxury*

Protective Pad

Important Information about this Pad

Materials:

Manufactured as a three-layer pad, the top layer is flat fiber suede; the middle layer is 65% polyester and 35% rayon; and the back material that touches the lift chair is 100% polyester with a vinyl backer.

Other information:

- **Color: Sand**
- **Size: 21"W x 22"D**

Usage and care:

The pad can hold up to one cup of fluid, as a urinary incontinence accident typically yields approximately one cup. After it has been wet and/or soiled, the pad may be hand or machine washed in warm water on the gentle cycle. The pad is a “wear item” that means the overall lifespan will depend on a number of factors, including usage habits and how it is washed.

**New non-skid leg levelers keep your lift chair
from sliding on a vast array of flooring**
